This app uses fun and playful characters to introduce them to basic math concepts. I'd like to wave one cautionary flag here, though. The flipped classroom is still built on the traditional model of teaching and learning. Children listen to lectures and learn. For younger kids this may not be the preferred method of learning. Often they don't have the patience or focus to sit through even the shortest lectures before they can interact and 'do'. We believe providing younger learners with tutorials that are interactive from the get-go is more productive for these students. Hence, why we launched K5 Learning. I would like to echo the request of Mr Jeff Richied in a different post. Khan Academy is a great resource to review and master all grade level math standards. Designed for 3rd-8th grade, this lesson is student-directed, self-paced, with lots of independence and authentic learning. The idea of the flipped classroom is that students undertake the "lecture" portion of a lesson at home so that in-class time can be more productively used for teacher directed practice and individual instruction. While many apps have sought to address the challenge of math education, few have succeeded as widely as Khan Academy. The safety limits at my school prevent some of the material from showing up, so I created this booklet to be used alongside the program. The books are in Cornell Note style format and include video links to YouTube and KhanAcademy, utilizing the idea of flipped teaching, as well as a series of chunking cards and writing exercises for each standard.
